

WattsEye Monthly Report

Choong Zhuo Lin - Petaling Jaya - May 2026

TOTAL USED	PROJECTED BILL	YOU SAVED	VS LAST MONTH
1480 kWh	RM 503	RM 18	-8%

Daily kWh (last 30 days)

TOP APPLIANCES

Air Conditioner	42%	RM 211
Fridge	18%	RM 91
Water Heater	12%	RM 60
Kitchen / Other	18%	RM 91
Lights & Fans	10%	RM 50

ACTIONS YOU TOOK

- AC auto-off enabled (saved 9 min/day avg)
- Shifted dishwasher to off-peak (4 runs)
- Reduced overnight standby (-18W)
- Confirmed routine baseline for kettle

TARIFF INSIGHT

Tariff plan: TNB RP4 Standard. Projected month: 1480 kWh.
ToU comparison: switching could save ~RM 12/month at your usage split.
Tier band: 1480/1,500 kWh used (99% of high-band cliff)

Per-Appliance Breakdown

May 2026 - 5 tracked appliances

Air Conditioner

622 kWh this month - 42% of bill

RM 211

Peak: 20:00 - 23:00

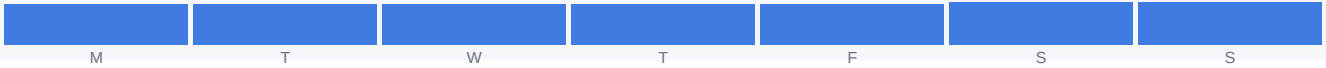

Fridge

266 kWh this month - 18% of bill

RM 91

Peak: all day (cycling)

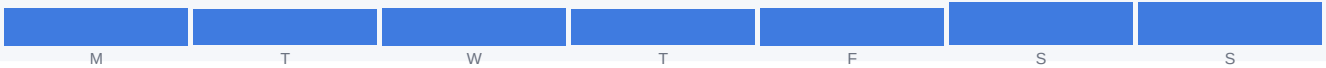

Water Heater

178 kWh this month - 12% of bill

RM 60

Peak: 06:00 - 08:00, 19:00 - 22:00

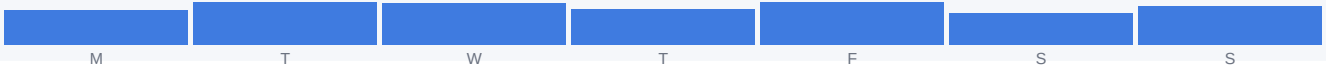

Kitchen / Other

266 kWh this month - 18% of bill

RM 91

Peak: 07:00 - 09:00, 18:00 - 20:00

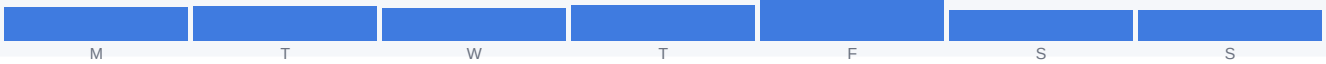

Lights & Fans

148 kWh this month - 10% of bill

RM 50

Peak: 18:00 - 23:00

Non-AC appliances are estimated via NILM (ELECTRicity Transformer trained on UK-DALE + ENERTALK). Air Conditioner is measured directly via the dedicated CT clamp.

Recommendation Log

May 2026 - 12 archetypes tracked

ACTED ON (4)

• AC auto-off enabled	saved RM 9.85/mo	Acted May 8
• Dishwasher shifted off-peak	saved RM 5.30/mo	Acted May 11
• Standby load reduced	saved RM 2.40/mo	Acted May 15
• Routine baseline confirmed	improves alert accuracy	Acted May 18

ACTIVE (5)

• Tier cliff approaching	save RM 18 if you stay <1500 kWh	High severity
• Switch to TNB ToU	save RM 12/month	Medium severity
• Bill trending +25% vs avg	RM 19 over baseline	High severity
• AC efficiency upgrade	RM 230/year potential	Capital decision
• Routine shift detected	+90 min later this month	Low severity

DISMISSED (3)

• Hot week pre-cool reminder	user dismissed May 12
• Phantom standby alert	user dismissed May 14
• Simultaneous peak warning	user dismissed May 20

Net effect this month: 4 actions taken, RM 17.55/month recurring savings established.
Coach learns from every accept / dismiss to re-rank future recommendations.

Tariff Math

TNB RP4 (1 Jul 2025 - 31 Dec 2027) - full bill breakdown

STANDARD TARIFF (1480 kWh projected)

Generation - low band (≤ 1500 kWh)	1480 kWh $\times$ 27.03 sen	RM 400.04
Generation - high band (> 1500 kWh)	0 kWh $\times$ 37.03 sen	RM 0.00
Capacity charge	1480 kWh $\times$ 4.55 sen	RM 67.34
Network charge	1480 kWh $\times$ 12.85 sen	RM 190.18
Energy Efficiency Incentive (EEI)	band-tiered rebate	RM 0.00
Retail charge	waived if ≤ 600 kWh	RM 10.00
AFA (Automatic Fuel Adjustment)	current month	RM 0.00

Projected total

RM 667.56

STANDARD vs TIME-OF-USE

STANDARD RM 667.56 45.11 sen/kWh effective	TIME-OF-USE (recommended) RM 655.56 saves RM 12.00/month - 35% peak / 65% off-peak
